## Information about storage in one common storage facility:

In bulk, store at about 5-10°C above melting point. Temperature higher than necessary degrades quality at rates dependent on time and temperature of exposure.

## Further information about storage conditions:

Exposure to ultraviolet light and sunlight must be minimized to prevent quality loss.

**7.3 Specific end use(s)** Used in Soaps, cosmetics, detergents; Lubricants, softening and release agents

## SECTION 8: Exposure controls/personal protection

**Additional information about design of technical facilities:** No further data; see item 7.

### 8.1 Control Parameters

**Ingredients with limit values that require monitoring at the workplace:**

**57-10-3 Palmitic Acid , 57-11-4 stearic acid**

Russia - Occupational Exposure Limits (OELs); STEL 5 mg/m<sup>3</sup>, JUNE 2003

**Additional information:** The lists valid during the making were used as basis.

### 8.2 Exposure controls

#### Personal protective equipment:

#### General protective and hygienic measures:

Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work.

Avoid contact with the eyes and skin.

#### Respiratory protection:

Appropriate NIOSH/MSHA approved air-purifying respirator should be used if a mist, vapor or dust is generated. A NIOSH/MSHA approved self-contained breathing apparatus or air-supplied respirator is recommended if the concentration exceeds the capacity of cartridge respirator.

#### Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

**Material of gloves** Use recommended rubber or plastic gloves to prevent skin contact.

#### Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

#### Eye protection:

Tightly sealed goggles

Safety glasses, goggles, or face shield recommended to protect eyes from mists or splashing.

**Body protection:** Protective work clothing

#### Risk management measures

Good industrial hygiene practices should be followed. Avoid breathing (heated) vapors. Avoid eye and skin contact.
